Quayle Action

1. This application is in condition for allowance except for the following formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 16, 17 and 24. Corrected drawing sheets, or amendment to the specification to add the reference character(s) in the description, are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because on line 5, “a first inclined” should be changed to “an inclined”; on line 6, “first” should be deleted; and on line 7, “first”, both occurrences, should be deleted. Correction is required. See MPEP § 608.01(b).

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

5. Claims 1-7 are objected to because of the following informalities. Appropriate correction is required.

On line 6 of claim 1, “a first inclined surface” should be changed to “an inclined surface”, since no second inclined surface is claimed in the language of claim 1.

On line 7 of claim 1, “first plane” should be changed to “plane”, since no second plane is claimed in the language of claim 1.

On line 7 of claim 1, “first angle” should be changed to “angle”, since no second angle is claimed in the language of claim 1.

On line 2 of claim 2, “a first inclined surface” should be changed to “an inclined surface”, since no second inclined surface is claimed in the language of claim 2.

After “claim 1,” on line 1 of claim 5, insert “wherein said inclined surface is a first inclined surface, said plane is a first plane and said angle is a first angle.

Art Unit: 2852

On line 7 of claim 7, "first plane" should be changed to "plane", since no second plane is claimed in the language of claim 7.

On line 7 of claim 7, "first angle" should be changed to "angle", since no second angle is claimed in the language of claim 7.

On line 10 of claim 7, "said engagement portion," first occurrence, should be deleted since this language is redundant.

Allowable Subject Matter

6. Claims 1-7 are allowed.

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Johroku et al. (US 5,809,384), Nozawa et al. (US 6,091,919), Nakajima (US 6,134,410), Nakajima (US 6,151,472), Nozawa et al. (US 6,195,521) and Nakajima (US 6,363,233) disclose a toner cartridge mounted in an image forming apparatus.
